

**How to look after your henna:**

- Keep the paste on as long as you can, the longer it stays on the skin, the darker the end stain will be.
- You can scrape the paste off, or simply allow it to fall off. Keep it dry for 24 hours.
- Expect it to be orange at first. It will darken to chocolate over a few days
- Keep it away from chlorine and bleaches (eg pool, cleaning products)
- Do not rub or exfoliate the stain
- Moisturize the skin. It will help to keep the design for longer
